

University	<i>National University of Science and Technology «MISIS»</i>
Level of English proficiency	<i>fluent</i>
Educational program and field of the educational program for which the applicant will be accepted	<i>1.3.8 Condensed matter physics. (Solid state physics)</i>
List of research projects of the potential supervisor (participation/leadership)	(2025-2026) RSF Grant 22-12-00259-II , leadership (2022-2024) RSF Grant 22-12-00259-II , leadership (2017-2021) RSF Grant 17-12-01505, participation
List of the topics offered for the prospective scientific research	Experimental research (low-temperature electron spin resonance) of spin systems with strong spin fluctuations <i>01.03.UK Physics, Condensed Matter,</i> Scientific interests: <u>Keywords:</u> <i>Low temperature physics, magnetism, electron spin resonance.</i> Experimental research on spin systems with exotic ordered or disordered states. E.g., low-dimensional magnets and frustrated spin systems, which due to a particular geometry of the exchange bonds and/or fine balance of different interactions can demonstrate correlated spin-liquid-like states at low temperatures. Electron spin resonance spectroscopy facilities are provided by P.Kapitza Institute for Physical Problems RAS
Prof. V. N. Glazkov <i>Dr. Sci, P.Kapitza Institute for Physical Problems RAS</i> SCOPUS ID: 7006676720 web: www.kapitza.ras.ru/people/glazkov/	Research highlights: <i>Electron spin resonance experiments down to 100 mK, in the fields up to 14 T and at microwave frequencies 1-300 GHz</i> Supervisor's specific requirements: <ul style="list-style-type: none"> • <i>Master degree in physics. Key topics: quantum mechanics, solid state physics, statistical physics</i> • <i>Experience of work in the experimental laboratory, skills in the experimental data processing (graphs plotting, fitting)</i> • <i>Sufficient level of spoken Russian and/or English;</i> • <i>Basic academic writing skills (the ability to express cause-and-effect relationships in the text),</i> Selected publications list: <ol style="list-style-type: none"> 1. <u>V.N. Glazkov</u>, "Magnetic resonance in low-temperature paramagnets", <i>Physics - Uspekhi</i> 67, 1248 (2024) 2. S. S. Sosin, A. F. Iafarova, I. V. Romanova, O. A. Morozov, S.L.Korableva, R. G.
